# ABOUT ME!

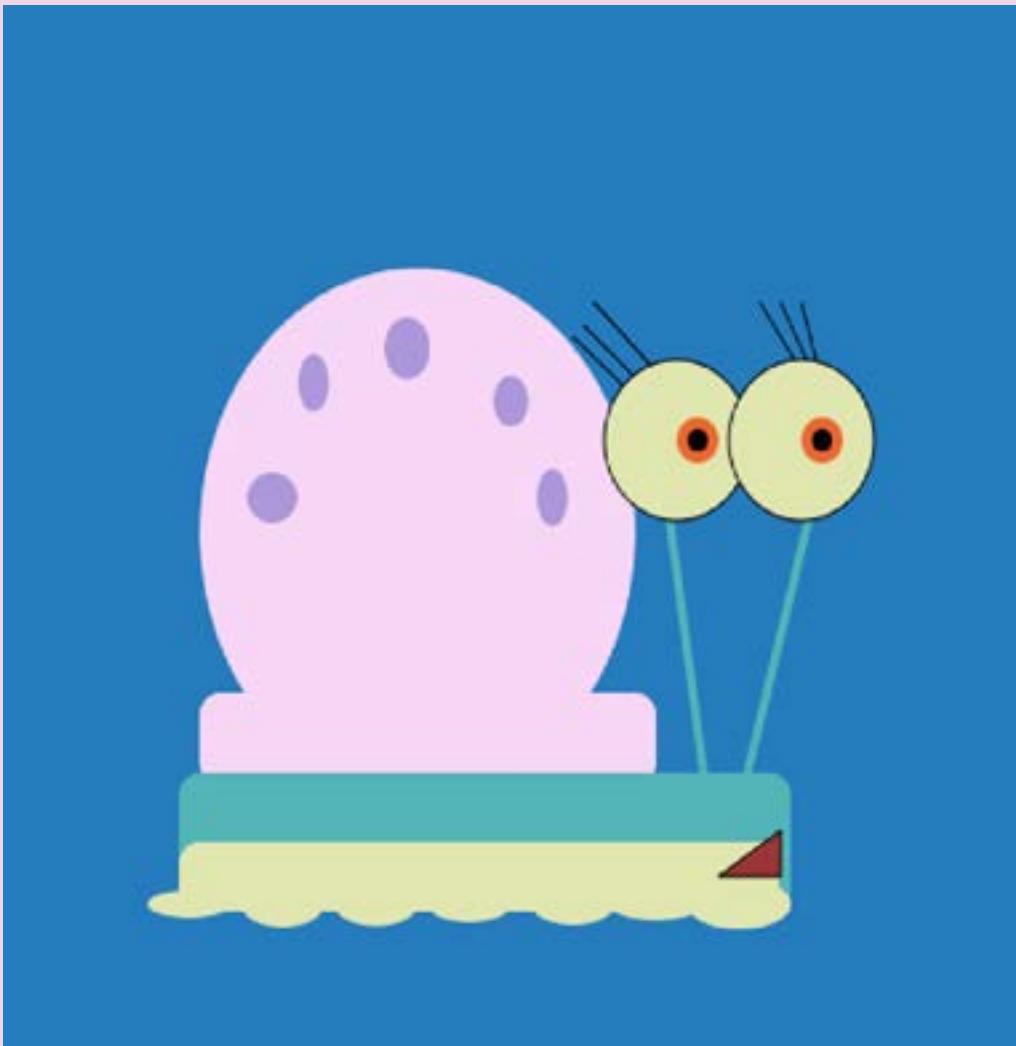

I am a rising senior at the University of Tampa studying Advertising and Public Relations with a minor in Business Administration.

In the future I intend on obtaining my own business, hopefully a bridal salon.

In the meantime, I will finish my degree this school year while being a part-time employee at CAMP Tampa working with children 6 months to 10 years. Working with children is a passion and hobby of mine and is where I find most joy in. I enjoy traveling with my boyfriend, being apart of a Sigma Delta Tau and teaching others how to be apart of something bigger than themselves.

## Canvas Project, 495 x 501, .p5js file, editor

For my first project of the semester I created Gary the Snail from Spongebob on editor. This was created by coding. I got inspiration from the internet. I first was searching on the Web to find a cartoon character that had easy shapes to create; and this is where I came across Gary. I enjoyed creating Gary because once I got use to the software it was easy moving and it was super cool to see the final product.
